

Week 8 — Midterm Exam Week: Quiz-1

CEN207 Data Structures (formerly CE205) · Fall 2026–2027 · 31.10–08.11.2026

Quiz-1 covers weeks 1–6 and is 40% of the midterm grade (the midterm project RAP1 is the other 60%).

Week	Topics to review
1	Big-O, memory layout, pointers
2	Linked lists (singly, doubly, circular, XOR), arrays, sparse matrices
3	Stacks and queues, expression conversion, Tower of Hanoi, recursion
4	Binary trees and traversals, heaps, heap sort, Huffman coding
5	Graph representations, BFS, DFS, topological sort
6	Linear/binary search, hashing and collision resolution

How to prepare

Replay the animations in each week's notes step by step, then solve the self-check questions at the end of each week without looking at the answers.
