

Week 16 — Final Exam Period: Quiz-2

CEN207 Data Structures (formerly CE205) · Fall 2026–2027 · 04–17.01.2027

Quiz-2 covers weeks 9–14 and is 30% of the final grade (the final project RAP2 is the other 70%).

Week	Topics to review
9	Graph algorithms: MST (Prim, Kruskal), shortest paths (Dijkstra, Bellman–Ford), SCC, max flow, cycle detection, backtracking
10	Sorting algorithms and their comparison
11	BST, AVL, red-black, splay and B-tree family
12	String search (KMP, Boyer–Moore), LCS, edit distance, alignment, tries
13	File organisation I: sequential and direct files, collision resolution
14	File organisation II: indexed files, B-trees for files, extendible hashing, external sorting
